WASHINGTON 25, D. C.

8 JUL 1958

AFCIN-1A2

MEMORANDUM FOR CHAIRMAN, Ad Hoc Requirements Committee
ATTN: Mr. James Q. Reber

SUBJECT: Request for Revision of the Highest Priority Objectives

1. It is requested the following objective be added to the Highest Priority Objectives on the AQUATONE (S) Collections List:

- a. Name: DNEPROPETROVSK AUTOMOBILE PLANT
- b. B. E. Number:
- c. Coordinates: 48-26-07N/34-59-22E

50X1

2. Justification for this objective is as follows: This proposed objective has been engaged in the series production of ballistic missiles since about 1950. Recent flight activity data indicates that the plant may be involved in the production of ICBM's. This objective has been constructed since WW II and no aerial photography of the installation exists. Extreme security measures preclude effective ground surveillance. Ground photography from remote vantage points has been of poor quality.
